

Student Assistants (f/m/d) for Research and Industry Projects

Your tasks:

- Work together with a motivating team on research and industry projects on existing and innovative topics: Artificial intelligence, distributed ledger technology, information privacy, digital health and gamification
- Support software development projects (frontend, backend) depending on your individual preferences and skills

We offer:

- Exciting insights into cutting-edge research and industry projects
- Work in a team of young and motivated researchers
- Work up to 40 hours a month (6-month contract, extension possible and likely)
- Work independently and flexibly on your tasks
- Participant in various events of the research group

Apply now with your **CV** and your latest **transcript of records** via cii-hiwi-office@aifb.kit.edu.
